How does law protect in war? Cases, Documents and Teaching Materials on Contemporary Practice in International Humanitarian Law

*by Marco Sassòli
and Antoine A. Bouvier*

A selection of more than two hundred and thirty cases provides university professors, practitioners and students with the most updated and comprehensive selection of documents on International Humanitarian Law (IHL) available. A comprehensive outline of IHL puts the contents of these cases into their systematic context and theoretical perspective. The main goal of this book is to show that IHL remains relevant in contemporary practice and that it provides answers to the humanitarian problems in armed conflicts.
